UNCG Speech and Hearing Center presents the “Listening Lab” summer camp for children diagnosed with auditory processing disorder (APD)

June 18, 2018—June 29, 2018

UNCG Speech and Hearing Center offers professional services for the evaluation and treatment of speech, language, and hearing disorders and communication differences for people across the lifespan. Graduate student clinicians work with clients under the direct supervision of UNCG faculty members who are certified by the American Speech-Language Hearing Association and licensed by the North Carolina Board of Examiners for Speech Language Pathologists and Audiologists. For more information about the Center, visit: http://csd.uncg.edu/shc.

Supervising Clinicians:

- Dr. Lisa Fox-Thomas, Ph.D., CCC-A
  AP Associate Professor & Licensed Audiologist; Certified iLs and IM Practitioner

- Dr. Amy Myers, Au.D., CCC-A
  AP Assistant Professor & Licensed Audiologist; Certified iLs Practitioner

- Dr. Sarah Allen, Au.D., CCC-A
  Licensed Audiologist & Certified iLs Practitioner

- Dr. Christopher Atkins, Ph.D., CCC-SLP
  AP Associate Professor & Licensed Speech-Language Pathologist; Certified iLs Practitioner

Camp Application Form

Please complete the following to apply for the 2018 “Listening Lab” summer camp.

Child’s Name: __________________________
Birthdate: ___________ Grade:_________
Phone: ________________________________
Address: ____________________________________________

Name of Parent or Guardian: ____________________________________________

Has your child been seen at UNCG previously?  
__Yes  ____No

Has your child had an APD evaluation?  
__Yes  ____No  Date: ____________

Has your child had an speech/language evaluation?  
__Yes  ____No  Date: ____________

My child is available to attend all ten sessions of camp:  ____Yes  ____No

Mail or Fax this form and copy of evaluation reports to:
Lisa Fox-Thomas Ph.D., CCC-A
UNCG Speech and Hearing Center
300 Ferguson Building, UNCG
Greensboro, NC 27402
(336) 334-4475 (Fax)

Welcome to the Listening Lab!

Auditory processing refers to the brain’s ability to process sound both accurately and efficiently. An auditory processing disorder (APD) usually results in problems “listening,” particularly in noisy conditions. Children also may have written or oral speech/language difficulties and problems with auditory attention or memory (such as following directions). UNCG Speech and Hearing Center offers a year-round auditory training program for children and adults who have been diagnosed with APD. This unique multi-disciplinary approach focuses on strengthening foundational auditory skills needed for listening, learning, and communication. The Center also offers the Listening Lab summer camp for school-age children. Individualized and group activities focus on improving listening skills in a fun, supportive environment. Camp is a great way to “jump start” your child’s journey toward better listening! To find out if your child is eligible for the Listening Lab summer camp, call (336) 256-2001 today (a limited number of spots are available).

Information:

Who: Children 7 - 12 years old who meet eligibility criteria (recent testing may be required prior to starting camp to determine eligibility).

When: Mon - Fri (6/18 - 6/22, 6/25 - 6/29) from 9:00 am-12:00 pm.

Where: UNCG Speech and Hearing Center
300 Ferguson Building, UNCG Campus
524 Highland Avenue, Greensboro

What: Three hours of daily, supervised auditory training (see below) including snack and breaks.

Cost: $600 for the two-week therapeutic program (financial assistance may be available depending on eligibility).

Activities:

Children rotate through listening stations and receive both group and one-on-one training in areas that may include:
- Auditory closure & memory
- Auditory integration and separation
- Auditory discrimination
- Listening comprehension

In addition, children who qualify will receive daily speech-language intervention. Campers also learn strategies for active listening and emotional regulation using the HeartSmarts™ curriculum.

One hour of integrated listening systems (iLS) auditory training will be provided each day. Go to www.integratedlistening.com to learn more about how your child may benefit from this multi-sensory approach.

Campers also will receive Interactive Metronome (IM) training to improve neural timing and synchronicity. For more information, visit their website at www.interactivemetronome.com.
